STRAWBERRY PLANTS

THOMAS PURE-BRED PLANTS ARE BEST. Write for 52-Page Catalog. Tells how plant, cultivate and market. Very instructive.

Mrs. Vest Felt Like Crying.

Wallace, Va.—Mrs. Mary Vest, of this place says: 'I hadn't been very well for three years, and at last was taken bad. I could not stand on my feet, I had such pains. I ached all over. I felt like crying all the time. Mother insisted on my trying Cardui. Now I feel well, and do nearly all my housework.' No medicine for weak and ailing women, has been so successful as Cardui. It goes to the spot, relieving pain and distress, and building up womanly strength, in a way that will surely please you. Only try it once.—Advertisement.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ill it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drugists. 50c large box or by mail.

DAIRY FACTS

THICK CREAM GAINS FAVOR

Colorado State Dairy Inspector Answers One of Most Common Questions Bothering Dairymen.

(By R. McCANN, State Dairy Inspector, Colorado Agricultural College.)

One of the most common questions arising among cream producers and handlers of cream is that of how thick cream should be skimmed, when the same is to be used in butter-making.

Cream skimmed so as to test between 35 per cent and 40 per cent is of the most desirable thickness. Thick cream keeps better than thin cream, there is also not the waste in handling a smaller bulk of cream than there is of larger amounts in the way of hauling and express charges, moreover the skim milk is kept on the farm for feeding calves and pigs. If it is too thick, there is a loss in some of the cream going over into the skim milk and also a considerable waste from the amount of cream that will adhere to cans and utensils.

A uniform richness of cream may be obtained at each separation.

1. By using the same amount of waste or skim milk when flushing the bowl.

2. By keeping the cream screw the same.

3. By running the separator at the same and at a uniform speed.

4. By having the temperature of the milk the same each time.

5. By keeping a uniform inflow to the bowl.

6. By washing the separator thoroughly after using.

Exactly the same butterfat test cannot be expected every time from the observation of the above, as there are other factors entering affecting results, but a close following of the six named checks on variation will work wonders toward getting a uniform thickness of cream throughout the season.

PREVENT COW FROM KICKING

Device Arranged Around Hind Quarters Acts as Simple Means of Educating Animal to Be Good.

With this new arrangement hooked up to her hind quarters, "bossy" will kick nobody but herself when she undertakes to show her resentment by a rear thrust at the milk pail or the dairy maid. After a few experiences with a kick which rebounds every time on herself, she soon becomes cured of the kicking habit. A

Reflex Kicking Strap for the Cow.

Kicking cow is an aggravation about the dairy and the device referred to has been recently patented and is a simple means of educating her to be good. It will be quickly seen how the device is applied to the hind leg of the bovine and also how any pressure exerted upon the device, as in an effort to kick, the energy thus expended will give her a sharp reminder that she is not to have it all her own way.

BEST FEEDING FOR PROTEIN

Necessity for Giving More Than One Grain—Wheat Bran, Corn and Stover Make Good Ration.

Dairywomen who are on a short allowance in the matter of grain naturally wish to keep down the expense bill, and make the mistake of feeding one grain only. For example, a correspondent asks which would give him the best results, corn or wheat bran, when, as a matter of fact, he should feed both to get anywhere near a balanced ration, and they should be fed in the proportion of one part of the wheat bran to six parts of the corn. This, with corn stover as roughage and with an occasional feed of oil meal or a change to some of the concentrated feeds like gluten meal, will supply a fairly balanced ration and not a costly one. Those who have to do with farm affairs are coming more and more to figure out these problems instead of guessing at what they should do or working on the same plans they followed years ago, when conditions were, perhaps, much different. This is going to the

The Home Group

A carefully selected list of leading periodicals especially prepared for the readers of the HOPKINSVILLE KENTUCKIAN.
